DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 2-3, 5, 7-8, 23-39 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Particularly, independent claims 23 and 31 include limitations directed to “the first switching event being characterized by unavailability of data stream information from the server” (see claim 23, lines 6-7 and claim 31, lines 7-8). However, the specification discloses a switching event characterized by a delay time associated with channel tuning, MPTS parsing, and rendering (see Specification, pg. 9; lines 9-10). The switching event delay time associated with channel tuning and the like does not support a switching event characterized by a break in data stream information from a server. The data stream information from the server would still be available during the delay time associated with channel tuning, MPTS parsing, and rendering. But the data stream information from the server would be unavailable for display during such a delay time.

Dependent claims 2-3, 5, 7-8, 24-30, and 32-39 are rejected for depending on rejected base claims 23 and 31.

Art Unit: 2614

It is believed that applicant meant to claim, "the first switching event characterized by unavailability of information from the server for display." Such an amendment to the claims would cure the defect.
